

Grid Mobile is launching usage monitoring and new no bill shock features

Singapore, 31 January 2020 - Grid Mobile announces the launch of usage monitoring and new no bill shock features on their price plan.

Customers can now track their usage via the Grid Mobile Portal. With this new functionality, customers are now in full control of how they use their service.

Grid Mobile will also enable customers to fully utilise the price plan entitlements of data, SMS and talk time without fear of a bill shock from excess charges. If customers use up any of the bundle entitlements, they can choose to continue the particular service by purchasing add on packs.

For just \$24.90 per month, Grid Mobile customers get to enjoy generous data of 40GB, 200 minutes outgoing calls, 200 SMS, free unlimited incoming calls and free Caller ID. On top of that, customers get 1 GB of data roaming in Malaysia.

New and current Grid Mobile customers can start enjoying these new features from 1 February 2020.

Grid Mobile is available for sign up at www.gridmobile.com.sg.

About Grid Mobile

Beyond offering data-focused mobile plans and digital products on a leading telecommunications network, Grid Mobile is the gateway to a world of rewards, from bill rebate, cashback to merchant offers for our customers.
